INTERNSHIP ASSESSMENT POLICY

The internship program aims to bridge the gap between academic knowledge and real-world experience for undergraduate students. By participating in this program, students can apply the theories and skills learned in the classroom to practical, hands-on tasks within a professional environment. The key objectives of the internships offered to students are as follows:

- **Gain Practical Experience**: Allow students to work in a real-world environment.
- **Navigate Real-World Challenges**: Equip students with the skills to effectively handle practical challenges and adapt to the complexities of a professional setting.
- **Enhance Communication and Interpersonal Skills**: Foster the development of solid communication and interpersonal abilities essential for success in any career.
- **Build Professional Networks**: Encourage the formation of positive professional relationships, which can serve as valuable references and connections for future employment opportunities.
- **Clarify Career Preferences**: Help students understand their work preferences and interests better.

Eligibility Criteria

After **completing the fourth semester**, the student can intern in an industry relevant to his field. The following are the eligibility criteria and the documents that the student needs to present to the internship committee. All the evaluations and document submissions are managed through an online portal called **NUST Internship Record System (NIRS)** :

1. Students must complete at least **six weeks** of internship (**with at least 75% attendance**).
2. The employer must **verify the intern's attendance record.**
3. The employer will **submit the internship survey**.
4. The student will **submit internship report** to the committee upon completion.

Internship Assessment Committee (IAC)

As per HEC directive, the university evaluates students' internships. The internship committee is the institute or the evaluation. Table 1 presents the hierarchy of the internship committee.

Table 1: Hierarchy of Internship Assessment Committee

IAC Head	
ILO	IAC Members

This committee would collaborate with the placement office through ILO to keep internship records.

Application Process

After completing the 4th semester, the student will contact ILO for internship placement. ILO is responsible for placing the student in a relevant industry in collaboration with the placement office. The student should remain in close coordination with ILO to ensure successful **Completion of the internship survey form by the employer and an Internship Certificate.**

After completing the internship, the **assessment committee members will evaluate the student as per section 1.**

Role and Responsibilities

Figure 1 presents the flowchart of the roles and responsibilities of the IAC team. The following are the relevant details:

- **ILO:** ILO is the first point of contact for students. The following are his responsibilities:
    a) Ensure the student has completed four semesters.
    b) Facilitate students securing internships from relevant industries in collaboration with the placement office.
    c) Ensure the employer fills out the internship form via NIRS.
- **IAC members:** IAC members should receive the list of students, along with their mid-internship reports, who have completed the internship from the ILO office at the start of the fall semester. The following are the IAC member responsibilities:
    a) Schedule interviews for the students.
    b) Evaluate the students out of 50 based on (i) attendance (10 marks) and (ii) Internship reports (40 marks).
- **IAC Head:** The following are the responsibilities of IAC head:
    a) Ensure smooth processing of the internship policy at every step.
    b) The IAC head will be the custodian of evaluations handed over by ILO and IAC members; these include
        i. Internship survey
        ii. Internship report
        iii. Internship attendance proof
    c) Submission of internship result (batch wise) at the end of batch's 6th semester.

Result Submission

The results will be compiled on an Excel sheet and presented in DBS. After approval, they will be made available to the students via NIRS.

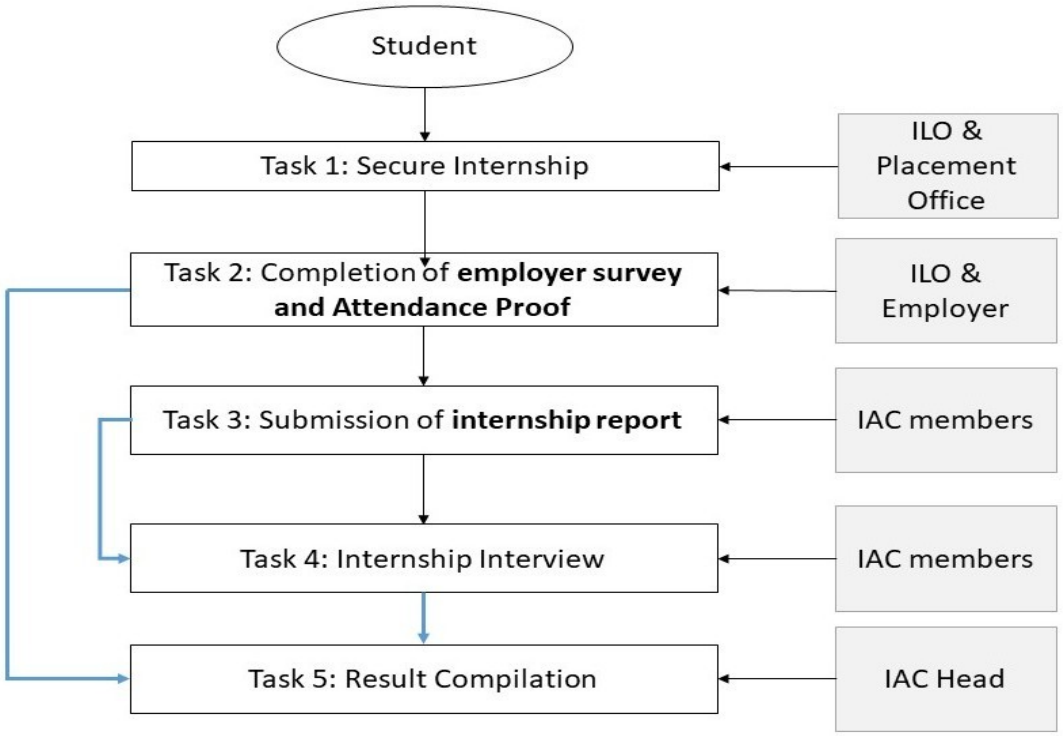

Figure 1: Flowchart of Internship evaluation

Internship Evaluation Status

2012 Intake	**99 students**
Completed evaluation	76 students
2013 Intake	**86 students**
Completed evaluation	19 students
